<b>General</b>	Keep Victim warm and quiet. Obtain immediate medical care. Ensure that attending medical personnel are aware of the identity and nature of the product involved, and take precautionary measures to protect themselves.
<b>Ingestion</b>	DO NOT INDUCE VOMITING. Rinse mouth with water and then give plenty of water to drink. Seek medical attention if large amounts ingested. Call Poison Centre 13 11 26
<b>Eye</b>	If in eye(s) wash with large amounts of water for approximately 15 minutes holding eyelid(s) open. Seek medical attention immediately.
<b>Skin</b>	Remove contaminated clothing and wash skin thoroughly decontaminate clothing before re-use or discard. If swelling, redness, blistering or irritation occurs seek medical advice.
<b>Inhalation</b>	Remove the source of contamination or move the victim to fresh air. Ensure airways are clear and have qualified person give oxygen through mask if breathing is difficult. If victim has stopped breathing begin artificial respiration, or if heart has stopped, cardiopulmonary resuscitation. Seek immediate medical attention.

**5. FIRE FIGHTING MEASURES**

<b>Hazchem Code</b>	1Y
<b>Extinguishers</b>	Use flooding amounts of water from a distance. Take care as contact with water will release toxic chlorine gas. Do not use foam or dry agent.
<b>Fire Fighting Procedures</b>	Wear self-contained breathing apparatus (SCBA) and protective clothing.
<b>Hazardous Decomposition Products</b>	Decomposes on heating emitting toxic fumes of chlorine as well as liberating oxygen.
<b>Other precautions</b>	Not combustible, however (oxidizer) ignites combustible or organic materials when in contact. Emits toxic fumes of chlorine as well as liberating oxygen, therefore dangerous in a fire situation. Keep away from heat, sparks or naked flames. Heating may cause explosion. Contact with acids or strong alkalis may generate heat.

**6. ACCIDENTAL RELEASE MEASURES**

<b>Spills</b>	Evacuate all unnecessary personnel. Wear protective clothing as specified in the Personnel Protection section of the SDS. Sweep up material and place into a suitable labelled container. Collect with spark free tools, avoid the creation of dust. Mop up the remaining material and place into the same container. If large quantities of the material enter the waterways contact the Environmental Protection Authority, or your local Waste Management Authority

**7. HANDLING AND STORAGE**

<b>Handling</b>	Avoid skin and eye contact and inhalation of dust. Wear appropriate protective equipment and clothing. Use in a well ventilated area. Avoid spillage onto floor. Keep containers closed when not in use. Maintain personal hygiene by washing hands prior to eating, drinking, smoking or using toilet.
<b>Storage</b>	Store in a cool, dry, well ventilated area, out of direct sunlight. Store in suitable, labelled containers. Avoid any dust build-up by frequent cleaning and suitable construction of storage area. Keep storage separated from work areas. Inspect periodically for deficiencies such as damage or leaks.
<b>Incompatibilities</b>	Store away from organic and/or combustible agents.

**8. EXPOSURE CONTROLS / PERSONAL PROTECTION**

<b>Exposure Standards</b>	No ingredients in this product have exposure standards, as outlined in the standard <i>Exposure Standards for Atmospheric Contaminants in the Occupational Environment</i> third edition, published by the National Occupational health and Safety Commissions/AGPS, 1995.
<b>Engineering Measures</b>	Avoid generating and inhaling dusts. Use in a well ventilated area only. Keep containers in a well ventilated area. Local exhaust ventilations system may be required, especially if chlorine gas evolved.
<b>Personal Protection Equipment</b>	
<b>Clothing</b>	Suitable protective clothing should be worn e.g. cotton overalls and safety shoes.
<b>Skin Protection</b>	Impervious PVC or rubber gloves should be worn.
<b>Eye Protection</b>	Safety glasses with side shields or goggles should be worn.
<b>Respiratory Protection</b>	If dust exists, wear respirator meeting the requirements of AS/NZS 1716.
