

Solar Inflatable Duck Swim Ring with lights

Model Number: FOBSLINFLDUK

Instructions:

- Inflate through the valve, do not over-inflate.
- Automatically charges in the sun.
- Once charged, the lights will automatically illuminate in darkness.
- Deflate and fold to store.

How to use:

- After inflating the product and putting it in the sun, it will charge automatically, and will illuminate in lower light. The working time is 6-8 hours.
- The large size and buoyancy makes it suitable for adults.

Note:

- For best results: Place in direct sun for 8-10 hours.
- Do not attempt to over-inflate to remove wrinkles. Wrinkles will flatten after using for 1-2 days.
- In cold weather you may need to re-inflate.

In order to protect the battery, it is recommended to recharge after a long period of non-use.

illuminate

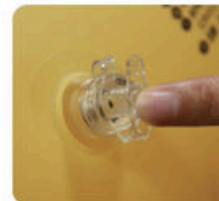

Solar charging

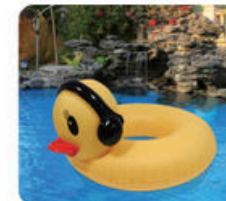

How to use:

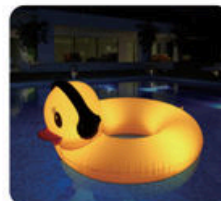

1. Open the inflation valve and inflate.

2. Close the valve and push the valve in.

3. Set the pool float in direct sun during the day for at least 6-8 hours.

4. The light will automatically illuminate in the dark.

5. When not in use, open the valve and deflate. Fold and store in box.
