

Review Date: 25 August 2021

1. IDENTIFICATION OF THE MATERIAL AND SUPPLIER

HY-CLOR LONG LASTING SWIMMING POOL Product Name(s):

TABLETS 4KG

Trichloroisocyanuric Acid; **Chemical Name:**

1,3,5-trichloro-1,3,5-triazinane-2,4,6-trione, **Synonyms**

Symclosene, trichloro-1,3,5-triazinetrion,

trichloroisocyanuric acid

HYCT10 - 1KG **Product Code:**

2468 **UN Number:** 56112 **APVMA Number:**

Recommended Use of the Chemical and Restrictions on

Use: Swimming Pool disinfectant and water treatment

Supplier: HY-CLOR AUSTRALIA PTY LTD

Street Address: 178 Power Street

Glendenning NSW 2761

Telephone Number: 02 8805 2400 **After Hours Contact:** 0404 859 515 02 8805 2401 Facsimile:

help@hyclor.com.au **Email Contact:**

13 11 26 (Australia Poisons Information Centre) **Emergency Telephone:**

Please ensure you refer to the limitations of this Safety Data Sheet as set out in the "Other Information"

2. HAZARDS IDENTIFICATION

Classified as hazardous according to the criteria of the GHS as adopted in Australia. A Dangerous Good according to ADG 7.5.

Poisons Schedule: S6. SIGNAL WORD: Poison

GHS Hazard Statement(s)

Oxidising Solid H272 May Intensify fire: oxidizer Category 2

Harmful if swallowed **Acute Oral Toxicity** Category 4 H302

Eye irritation/corrosion Category 2 H319 Causes serious eye irritation

May damage fertility or the unborn child Reproductive toxicity Category 1 H360

Specific Target Organ Category 3 May cause respiratory irritation H335

Toxicity, Single Exposure

Aquatic acute toxicity Category 1 H400 Very Toxic to the aquatic life

O Very toxic to aquatic life with long lasting effects Aquatic chronic toxicity Category 1 H410

Product Name: Hy-Clor Long Lasting Swimming Pool Tablets 4KG

2021

Review Date: 25 August 2021

Precautionary statements

Prevention:

P210: Keep away from heat.

P220: Keep/Store away from clothing, other chemicals, acids and combustible materials such as paper,

fabric, sawdust or kerosene.

P221: Take any precaution to avoid mixing with combustibles, acids and other chemicals ...

P261: Do not breathe dust.

P264: Wash face and hands thoroughly after handling.

P270: Do not eat, drink or smoke when using this product.

P271: Use only outdoors or in a well-ventilated area.

P280: Wear protective gloves/ eye protection/ face protection.

P273: Avoid release to the environment. - if this is not the intended use.

Response:

P301 + 312 +P330 + P331: IF SWALLOWED: Rinse mouth. Do NOT induce vomiting. Immediately call a POISON CENTER or doctor/physician if you feel unwell.

P304 + P340: IF INHALED: Remove victim to fresh air and keep at rest in a position comfortable for breathing.

P305 + P351 + P338: IF IN EYES: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing.

P337 + P313: If eye irritation persists: Get medical advice/attention.

P370+P378: In case of fire: Use water for extinction.

P391: Collect spillage.

Storage:

P403 + P233: Store in a well-ventilated place. Keep container tightly closed.

P405: Store locked up.

Disposal:

P501: Dispose of contents/container in accordance with local & regional waste disposal legislation

Signal word Danger

Label Statements: Keep out of reach of Children

Read Label before use

If medical advice is needed, have product

container or label at hand.

3. COMPOSITION / INFORMATION ON INGREDIENTS

Ingredient	CAS Number	Concentration (% w/w)
Trichloroisocyanuric acid	87-90-1	98
Boric Acid	11113-50-1	2

Product Name: Hy-Clor Long Lasting Swimming Pool Tablets 4KG

2021

Review Date: 25 August 2021

4. FIRST AID MEASURES

If poisoning occurs, or medical advice needed contact a Poisons Information Centre. Phone Australia 13 1126 or a doctor. Have this SDS when you call.

Swallowed: Do not induce vomiting unless advised to do so from, a medical

practitioner. Give a glass of water. Wash out mouth with water. Seek

medical attention.

Skin: Rinse with plenty of water for at least 15 minutes then remove

contaminated clothes. Wash affected area thoroughly with soap and water. Remove contaminated clothing and wash before reuse or discard. If irritation occurs seek immediate medical attention.

Eye: If in eyes, remove contact lenses if present, hold eyes open, flood with

water or normal saline solution for at least 15 minutes. Take care not to rinse contaminated water into the non-affected eye. If irritation occurs

seek immediate medical attention.

Inhaled: Remove from contaminated area. If symptoms) such as wheezing,

coughing, shortness of breath, or burning in the mouth, throat, or chest)

develop seek medical attention.

Note to Physician

First Aid Facilities
Medical Conditions that
may be aggravated by

exposure

Treat symptomatically
Eye wash and normal washroom facilities. First Aid Kit.
Asthma and respiratory and cardiovascular disease.

5. FIRE FIGHTING MEASURES

Suitable extinguishing media:

Flooding water spray from a distance. Do not use foam or dry agent.

Special hazards arising from the chemical:

Consider downwind evacuation. Remove ignition sources. Closed containers may rupture violently when heated. Thermally unstable. Decomposes at 225 °C). Keep containers cool.

Inhalation, ingestion or contact (skin, eyes) with vapors or substance may cause severe injury, burns or death. Fire may produce irritating, corrosive and/or toxic gases. May react with water releasing gaseous chlorine. If mixed with a small amount of water, the concentrated solution (with pH at about 2.0) may explode due to the evolution of unstable nitrogen trichloride.

May react explosively with hydrocarbons (fuels). May ignite combustibles (wood, paper, oil, clothing, etc.). Runoff may create fire or explosion hazard. Runoff from fire control or dilution water may cause pollution.

Special protective equipment and precautions for fire firefighters:

The product is not combustible. In confined areas or areas of excessive smoke, fire fighters must wear full protection and self-contained breathing apparatus.

Hazchem Code: 1

Product Name: Hy-Clor Long Lasting Swimming Pool Tablets 4KG

2021

Review Date: 25 August 2021

6. ACCIDENTAL RELEASE MEASURES

Personal precautions, protective equipment and emergency procedure

Evacuate all unnecessary personnel. Keep combustibles (wood, paper, oil, etc.) away from spilled material. Stop leak if you can do it without risk. Do not get water inside containers. Avoid skin and eye contact and inhalation of dust. Wear appropriate protective equipment and clothing – See section 8. Use in a well ventilated area. Avoid spillage onto floor. Keep containers

closed when not in use.

Environmental precautions

Keep spilt products out of drains, sewers and waterways. If large quantities of this material enter the waterways contact the Environmental Protection Authority, or your local Waste Management Authority.

Methods and materials for containment and cleaning up

For **minor spills**, contain and absorb with inert materials (sand, earth), sweep up, place contaminated material in a sealed container and place in garbage. Wash area down with excess water. For large spills contact the emergency response number.

7. HANDLING AND STORAGE

Keep out of the reach of children.

Precautions for safe handling

Avoid skin and eye contact and breathing in dust. Wear appropriate protective equipment and clothing. Remove contaminated clothing. Use in a well ventilated area. Avoid spillage onto floor. Maintain personal hygiene by washing hands prior to eating, drinking, smoking or using toilet.

Safe storage, including any incompatibilities

Store in a cool, dry well-ventilated area, out of direct sunlight. Store in labelled, original containers. Keep containers tightly closed and upright. Avoid spillage onto the floor. Do not allow into contract with water. Store away from sources of ignition, heat and incompatible materials described in Section 10.

8. EXPOSURE CONTROLS / PERSONAL PROTECTION

Occupational Exposure Limits: Exposure limits have not been established by Safe Work Australia for

this product or any of its components. It is appropriate to apply the exposure standard for nuisance dusts of 10 mg/m3, measured as

inhalable dust (8 hour TWA).

Exposure controls

Appropriate Engineering Controls:

Technical measures and appropriate working operations should be given priority over the use of personal protective equipment. Avoid generating and inhaling dusts. Use in a well ventilated area only. Keep containers in a well ventilated area. Local exhaust ventilations system may be required, especially if chlorine gas evolved.

Personal Protective equipment - for manufacturing and bulk handling situations:

Product Name: Hy-Clor Long Lasting Swimming Pool Tablets 4KG

2021

Review Date: 25 August 2021

The selection of PPE is dependent on a detailed risk assessment. The risk assessment should consider the work situation, the physical form of the chemical, the handling methods, and environmental factors.

Skin Protection: Suitable protective clothing should be worn e.g. cotton

overalls and safety shoes. Wear gloves of impervious material such as nitrile rubber (glove thickness 0.11 mm & breakthrough time > 480 min) that comply with

AS/NZS 2126. Final choice of appropriate gloves will vary according to individual circumstances i.e. methods

of handling or according to risk assessments

undertaken.

Eye Protection: Tightly fitting safety goggles or full-faced shields as

appropriate recommended and that comply with AS/NZS 1336 and 1337. Final choice of appropriate eye/face protection will vary according to individual circumstances i.e. methods of handling or engineering controls and

according to risk assessments undertaken.

Respiratory Protection: Respiratory protection is not normally necessary, unless

the production of dust is significant. In such cases, a suitable respirator may be worn that meets the

requirements of AS/NZS 1715 and 1716.

Personal Hygiene: Always wash hands after handling this product.

9. PHYSICAL AND CHEMICAL PROPERTIES

Appearance: White to cream, Vapour density:

granules

Odour: Chlorine

pH: 2.8 (1% solution)

Pa)

10. STABILITY AND REACTIVITY

Reactivity:

May react with water, acids, acyl halides, sulfonyl halides, and chloroformates oxidizing agents, strong halogenating agents. Hazardous decomposition products are Chlorine, Oxides of Carbon, Oxides of nitrogen,, boric anhydride

and hydrogen.

Chemical Stability: Rapidly decomposes on exposure to air. May decompose

violently if exposed to heat or direct sunlight. Stable if stored and handled under recommended conditions.

Possibility of hazardous

Incompatible materials:

reactions:

A risk of explosion and/or of toxic gas formation exists with the following substances: Water, acids, acyl halides, sulfonyl halides, and chloroformates oxidizing agents, strong halogenating agents. May react with water releasing gaseous chlorine. If mixed with a small amount of water, the concentrated solution (with pH at about 2.0) may explode due to the evolution of unstable nitrogen

trichloride.

Conditions to avoid: Combustible substances, sources of ignition, open flame

and heat. Other chemicals, foodstuffs and water. Acids, water, alkalis, calcium hypochlorite (dry or

hydrated), carbonates, hydroxides, nitrogen compounds,

sodium hypochlorite, reducing agents, ammonium

compounds and oils and greases.

11. TOXICOLOGICAL INFORMATION

No data available for the product. Information given is based on the triisochlorocyanuric acid (98% w/w) and boric acid (2% w/w)

Acute Oral Harmful if swallowed. Ingestion may cause Abdominal

pain. Burning sensation. Shock or collapse.

Triisochlorocyanuric acid: Oral LD50 (rat) = 406 mg/kg.

Boric acid: Oral LD50 (rat) = 2000- 4000 mg/kg

Acute Dermal Triisochlorocyanuric acid: Dermal LD50 (rabbit)

>

2000mg/kg. Boric acid: Dermal LD50 (rabbit) >

2000mg/kg.

Skin corrosion/irritation May cause mild skin irritation/redness.

Serious eye damage/eye

irritation

Causes burns and is a severe eye irritant.

12. ECOLOGICAL INFORMATION

duct. Information given is based on the triisochlorocyanuric acid % w/w).
Triisochlorocyanuric acid: <i>Daphnia magna</i> 48 hr EC50 160 – 800 μg/L. Bluegill (<i>Lepomis macrochirus</i>) 96 hr EC50 200 - 230 μg/L. Rainbow trout (<i>Oncorhynchus mykiss</i>) 96 hr LC50 80 – 330 μg/L.
Boric acid: Rainbow trout (<i>Oncorhynchus mykiss</i>) 96 hr LC ₅₀ 79 - 100 ppm. Channel catfish (<i>Ictalurus punctatus</i>) 96 hr LC ₅₀ 22 -155 ppm
Triisochlorocyanuric acid: The chloroisocyanurates ultimately degrade to cyanuric acid when used for bleaching, sanitizing, and disinfection applications. Cyanuric acid, has been shown to undergo biodegradation.
Boric acid: no data found,. Triisochlorocyanuric acid: Low potetenial. An estimated BCF of 3.1 was calculated using water solubility of 1.20x10 ⁴ mg/L.
Boric acid: Highly water soluble materials are unlikely to bioaccumulate. The octanol/water partition coefficient for boric acid measured as 0.175, indicating low bioaccumulation potential.

Mobility in soil

Triisochlorocyanuric acid: The Koc is estimated as 25 using a water solubility of 1.20X10⁴ mg/L. This suggests that trichloroisocyanuric acid is expected to have very high mobility in soil.

Boric acid: Field studies have observed boron to leach readily in soil

PBT identification:	This product is not identified as a PBT/vPvB substance.
Other adverse effects: None known.	

13. DISPOSAL CONSIDERATIONS

Disposal: Rinse empty containers in the pool and dispose of by wrapping with paper and putting in garbage. For larger quantities, refer to Refer to local government authority for disposal recommendations. Dispose of material through a licensed waste contractor. Leave chemicals in original containers. No mixing with other waste. Handle uncleaned containers like the product itself.

14. TRANSPORT INFORMATION

Consult the ADG 7.5, IMDG and ICAO/IATA Codes for all the transport requirements for the specified UN Number.

16. OTHER INFORMATION

ADG Australian Code for the Transport of Dangerous Goods by Road &

Rail Edition 7.5, 2017

AS/NZS Australian Standard/New Zealand Standard

CAS Number: Unique Chemical Abstracts Service Registry Number

EC₅₀: Ecotoxic Concentration 50% – concentration in water which is fatal to

50% of a test population (e.g. daphnia, fish species).

GHS: Globally Harmonized System of classification and labelling of

chemicals (GHS)

Hazchem Code: Emergency action code of numbers and letters that provide

information to emergency services, especially fire fighters

HCIS: Hazardous Chemical Information System

(http://hcis.safeworkaustralia.gov.au/HazardousChemical)

IARC: International Agency for Research on Cancer

LD₅₀: Lethal Dose 50% – dose which is fatal to 50% of a test population

(usually rats).

IDLH: Immediately dangerous to life or health (IDLH) is defined by the US

National Institute for Occupational Safety and Health (NIOSH)

LC₅₀: Lethal Concentration 50% – concentration in air which is fatal to 50%

of a test population.

NTP: National Toxicology Program (USA)

SDS: Safety Data Sheet

STEL: Short term exposure limit (STEL) means the time-weighted average

maximum airborne concentration of a substance calculated over a 15

minute period.

TWA: 8-hour Time-weighted average (TWA) means the maximum average

airborne concentration of a substance when calculated over an eight-

hour working day, for a five-day working week.

WES: Workplace exposure standard

UN Number: United Nations Dangerous Goods Number
